Lake Landfill
Efforts](#)

Dear Ben,

Quick Updates:

1. **Wednesday, July 23, 2015:** The Nuclear

Regulatory Commission posted an [event notice](#) that Ameren Missouri's Callaway 1 nuclear reactor experienced an unplanned shutdown. Above normal radiation levels were detected in the containment building. MCE will continue to follow this evolving event.

2. **Thursday, July 22, 2015:** MCE, Just Moms STL, and the Franciscan Sisters of Mary shared a [letter](#) authored by Senator McCaskill, Senator Blunt, Congressman Clay, and Congresswoman Wagner to the Department of Energy asking for it to review whether the West Lake Landfill qualifies as a FUSRAP site. MCE and many [St. Louis institutions](#) have asked our federally elected officials to put FUSRAP in charge at West Lake. MCE thinks the letter to the DOE is a big step in the right direction and a big win for the people closest the landfill. Find the contact information for our federally elected officials at the bottom and thank them for their bipartisan effort to resolve the complex problems at the smoldering and radioactive West Lake Landfill.
3. **Always** report odors to the [Department of Natural Resources](#) (DNR) if you believe the landfill is the cause. The DNR is collecting odor complaints while Attorney General Koster is legally involved with Republic Services, the landfill owner.
